

Delete Lost Copies in Destiny

1. **Back Office** tab > **Inventory** on left sidebar.
2. Click **View "Lost"** Button. NOTE: The View "Lost" button will not appear if an Inventory is In Progress. You will need to finalize any In Progress Inventories in order to view the Lost Copies list and delete them from your collection.

3. At the bottom of the Lost Copies screen, select a date for **Delete all copies marked "lost" on or before _____**. Then click **Delete All**.

NOTE: If you **Reset Lost** copies, Destiny will make them "found" and put them back into your collection as available. This is useful if you Finalize an Inventory prematurely, resulting in titles being marked Lost by mistake.
